STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.

PRODUCT NAME:

AMBER IVORY

Popular blend of amber, orange brown and white semi-crushed small and medium sized pebbles set in an off white cement and sand base.

Things you should know

Warm sandy orange hues dominate the projected colour and deliver a finish that suits post-war period and art deco architecture.

The nature of the pebble used in this product is that it often contain dust similar in colour to the stone from which it is derived. The dust acts somewhat like a pigment and skews the colour of the off white cement base.

A whiter (cleaner) base colour can be achieved with the inclusion of white pigment.

SPECIFICATION:

Vic Mix Amber Ivory 25MPa
Exposed Aggregate Concrete

ORDER CODE:

W_AMBIV

REVISION: 23/12/2016
