

STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

PRODUCT NAME:

## 7mm Permeable Concrete

7mm stone set in a grey cement base creates a simple and classic look.

### Things you should know

Permeable Concrete is a special type of concrete with a high porosity used for concrete flatwork applications that allows water from precipitation and other sources to pass directly through, thereby reducing the runoff from a site.

The stone used in this product is sourced from a major high production hard rock quarry within the greater Melbourne area.

Also available in different colours.

SPECIFICATION:

Vic Mix 7mm Permeable  
Concrete in Grey Cement

ORDER CODE:

PC7

REVISION: 01/05/2021

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.
